LDXA Series

6 and 12 Volts

Decorative Battery Units

Typical Specification

Supply and install the Ready-Lite **LDXA Series** battery units. The battery unit shall come complete with two MR16 emergency light heads.

The unit shall be rated for dual input voltage: 120 / 347 V, 60 Hz. The unit shall provide the nominal load during at least 30 minutes up to 87.5% of the nominal voltage of the battery. The charger shall be factory set with a charging voltage tolerance of $\pm 1\%$ to enable a longer battery life.

The emergency light heads shall be fully adjustable and protected by a clear cover, made of shock resistant polycarbonate. The protective cover shall be designed to facilitate the lamp replacement. The heads shall be installed at the bottom of the unit, providing an illumination in any direction. The emergency light heads shall require no tools for adjusting or aiming. The metal cabinet shall be made of steel with anti-corrosion undercoating.

The unit equipped with the self-diagnostic micro-controller board shall self-test 1 minute every 30 days, 10 minutes the 6th month and 30 minutes every 12 months. The unit shall be supplied with a test switch and diagnostic LED indicator lights to continuously monitor the status of the unit: Battery Failure, Battery Disconnect, Charger Failure, Lamp Failure, Service Alarm, main voltage AC "ON", Charger High Rate.

The unit shall be CSA Certified to C22.2 no. 141.

The unit shall be Ready-Lite model: _____.

Features

- Rugged steel cabinet with corrosion-resistant undercoating
- Removable front panel on cabinet provides easy access and allows unit to be mounted at ceiling height
- Solid-state pulse-type charger – current-limited, temperature-compensated, short-circuit proof and reverse-polarity protected
- Unit comes standard with electronic lockout and brownout circuits
- Sealed dust-proof transfer relay, test switch and LED indicator light(s)
- Long-life, maintenance-free lead acid battery
- NEXUS® compatible
